PROGRAM AGENDA*

Wheat Production

- Agronomics
- Production and Management

Variety Selection

- Variety Selection Criteria
- Variety Performance and Availability

Disease Management

- Identification
- Management
- Fungicide Use

Soil Fertility

- Balancing Economics
- Placement and Effectiveness

Open Topic Discussion

Insects, Economics, Winter Grains,
Oats/Barley, Forage Under-seeding, Weeds,
Herbicides, Rotations

* *Agenda and topics will vary at each location.*

JOIN US.....

GETTING THE MOST FROM YOUR SMALL GRAIN ACRES

With increasing workloads, problematic pests, and a goal of crop diversity, interest in successfully growing wheat remains constant. The first objective of this program is to help you determine if wheat will work on your farm, in your rotation, and if it can be profitable.

The second objective is to hand you the tools needed to make small grains successful and profitable on your farm. This includes information on today's production practices, variety selection, insect and disease management, weed control, and soil fertility.

The Southern Wheat Tour is a Program of the University of Minnesota Extension and is sponsored by Minnesota Association of Wheat Growers.
