# PRAIRIE GRAINS Media Kit 2018-2019

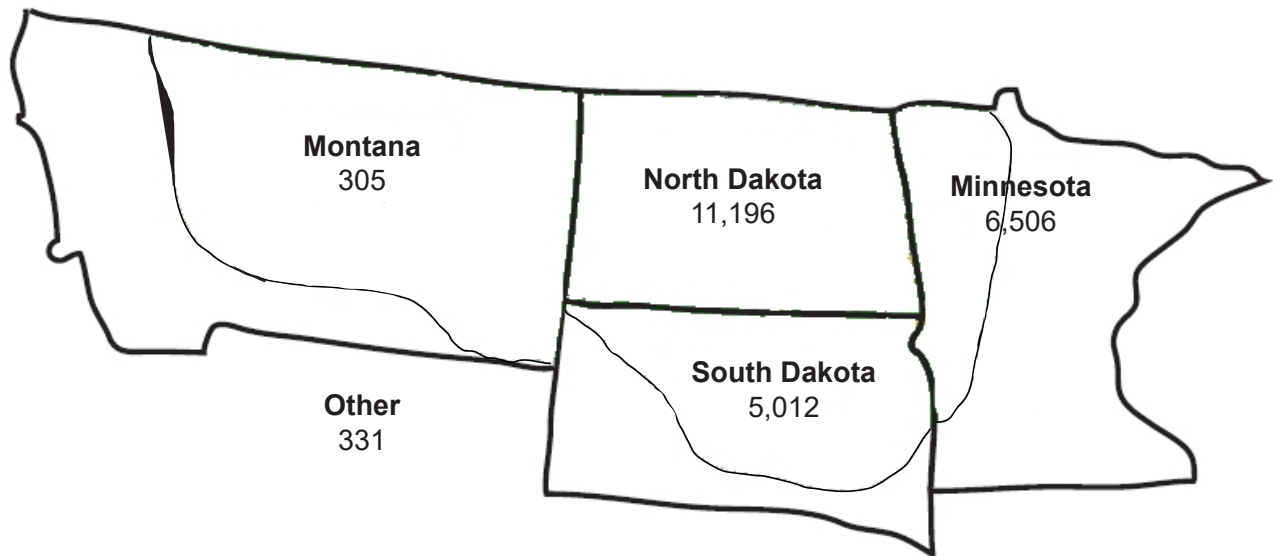

Prairie Grains Magazine has a well-defined circulation of the top 23,350 small grains growers in Minnesota, the Dakotas and Montana. If you need to target your message to decision-makers in small grains production, Prairie Grains Magazine is the place to do it.

Prairie Grains Magazine is circulated to members of the Minnesota Association of Wheat Growers, Montana Grain Growers Association, North Dakota Grain Growers Association, South Dakota Wheat, Inc., and Minnesota Barley Growers

Association as well as non-member growers who produce 250 acres or more of spring wheat and barley in North Dakota and Minnesota, plus all upper-level & associate MGGA members receive Prairie Grains.

Our list is continually updated with data from grower associations, county data from the Farm Service Agency and many other sources to be sure we're landing in the mailboxes of your target audience: the region's most innovative and successful small grains growers.

## Total Circulation: 23,350

**Award  
Winning  
Magazine**

Prairie Grains Magazine was the recipient of the 1998 President's Award for Magazines & Journals, awarded by the Minnesota Society of Association Executives.

## Reaching the RIGHT Growers:

Prairie Grains readers in North Dakota, Northwestern and West-Central Minnesota harvested more than 80% of the total harvested crop acres in those areas.
